

AirStud

The ergonomically designed pit mat that delivers proven comfort, grip, and safety.

AirStud's unique offset stud design creates an air cushion for your feet, providing multiple health and comfort benefits over time. Interlocking edges ensure the mats fit tightly together. It's stud top surface works as anti-slip matting while the studded underside provides cushioning to take the pressure off your feet, legs, and back.

Applications

Dairy pit, work station

Properties

Made from recycled rubber using a unique vulcanisation process. Fully sealed and won't hold moisture or bacteria.

Slip Resistant

Recycled Rubber

Fatigue Relief

Specifications

Features
